Problems encountered and resources required: The obstacles were associated with the target groups, as bridging the gender gap and identifying them has been the primary goal of the activities carried out under the SVEEP initiative. The majority of the target demographics shown disinterest in voting and the democratic process. However, the young energetic students served as a connecting link to motivate them. When any service work is started, there are huge obstacles to complete it. On the initial stage students had to encourage for different activities. With the help of NSS unit, University outreach cell and other departments, initiative was taken and devotion from the staff was also very helpful. As such there is no major problem encountered in the implementation of this practice. Other than meagre financial support, no additional resources were required. The principal of the college extended all-encompassing support to the teachers and the students for their social services.
